The Chase Scientific Glass, Inc. vial production facility manufactures clear and amber vials and containers with screw thread, aluminum seal or specialty finishes from all common glass formulations. Customized printing, decorating and packaging is available for customers with special needs.

# Quality, Value, Service... for the world

The Chase Scientific Glass, Inc. manufacturing facility is located west of Knoxville, TN, with ample room to expand its 300,000 square foot manufacturing and distribution space. It is staffed by a stable work force operating on a 3-shift basis. Our German subsidiary, Scherf Praezision Europa GmbH, located in Meiningen, Germany, produces laboratory and specialty glassware for the European market.
