"To provide products and services that conform to the requirements of our customers and to deliver them on-time, every time without defects. We will provide ongoing training to our employees, strive to continuously improve our process to offer the best quality, value and innovative products to our customers."

UNMATCHED SERVICE, AND FAIR PRICES

Since our beginning in 1997, Cobra Metal Works has stood for one thing: QUALITY. A modern machine shop specializing in turning automotive components, we possess only the most up-to-date equipment available and employ the most highly trained and motivated staff anywhere. Our rapid growth is a testament to our commitment to unequalled customer satisfaction.

Utilizing *Process Manufacturing*, which affords a much higher level of consistency and accuracy, and eliminates manufacturing variations through the use of detailed procedural protocols, we are able to continually tighten tolerances and improve quality. From the toughest specifications and tightest tolerances, we produce quality parts that exceed industry standards and are the pride of our company. Our strong working relationship with our customers provides an environment for creativity, productivity, and quality.

As a QS-9000 and ISO 9002 certified company, we can assure you consistent quality and no-nonsense on-time delivery of your critical parts. At Cobra Metal Works, we are continuously striving to improve quality even further.

We will continue to be a leader in our field and to produce parts that exceed our customers' most demanding specifications.
